

## City of Plantation High Efficiency Toilet Retrofit Program

Utility Customer:

The City of Plantation has teamed up with the South Florida Water Management District through a grant to assist in replacing older toilets that use an excessive amount of water per flush (toilets made before 1992). Participating residents who replace one of these toilets with an approved High Efficiency, Low Flow toilet that uses an average of 1.28 gallons per flush and has a Maximum Performance (MaP) rating – the flushability rating – of 800 grams or more, will receive a \$100 credit on their account. The list of approved toilets can be found at our Customer Service office in City Hall or under the **Announcements** section on the City website, [Plantation.org](http://Plantation.org). Should you have any question as to a toilet's eligibility, please call us!

We received information from various vendors, and have established a list of contractors who will provide you directly with an approved toilet and/or its installation. Of course, a homeowner may elect to install their own toilet purchased from a local home improvement center or plumbing supply company and also provide the installation by a plumber of their choice.

- **Green Dwellers** offers a choice of models of the highly-rated Caroma Brand of dual-flush, high efficiency toilets starting at \$199 picked up, and \$229 delivered. It is located at 5215 West Broward Boulevard, Plantation (phone 954-533-2295).
- **Redmarq Homes** will offer the Glacier Bay/Pegasus Standard Bowl Model N2225R-AIO toilet for \$175 delivered. Other models available at additional pricing. Contact James Redmond at 1-866-732-8347.
- **Wool Plumbing Supply** will offer the Kohler 3609-0 Cimarron Elongated Bowl 2-piece toilet at \$215.70 delivered. Other models available at additional pricing. Contact Hector Terlato at 954.846.8578, extension 310.
- **Home Depot** has various approved models such as the Glacier Bay Standard Bowl for \$98 and the Glacier Bay Elongated Bowl for \$128. Telephone one of the area Home Depots for further information.
- **Lowe's Home Improvement** has a number of approved models in stock. Telephone one of the area Lowe's for further information.

Installation is to be arranged directly by the homeowner. Several licensed plumbers have proposed basic installation charges but final costs will be site-specific. You should verify any contractor's license and insurance information before contracting directly with them. Again, you may perform the installation yourself, should you believe you are qualified.

Included with most toilets are a new wax ring "seal" and a toilet seat. Other options are available from the suppliers and/or installers. Each of these installers has agreed to additional fixed prices for optional services such as the installation of a new service supply shut-off valve and repair to or the replacement of the mounting flange. This information will be made available at the Utilities Department Customer Service office.

This program is limited to one thousand (1,000) qualified completed installations and also limited to two (2) installations per customer/household. Installation must be completed by August 1, 2009 to qualify for and receive a one hundred dollar (\$100) credit on their water-sewer account.

For further information or to confirm your participation, please call (954) 797-2293 or send an e-mail to [water@Plantation.org](mailto:water@Plantation.org). Additional detailed pricing information will be available in the Customer Service office.

Remember, your new toilet must replace an older, less-efficient model with an approved High Efficiency, Low Flow toilet that uses an average flush of 1.28 gallons per flush and Maximum Performance (MaP) rating – flushability rating – of 800 grams.
