INTRODUCTION

The 1989 Comprehensive Plan for Plantation constitutes an update of the 1981 Plan. The 1989 plan was prepared to conform with the State statute and administrative code (9J-5) requirements.

This Comprehensive Plan has been prepared in two volumes. Volume I constitutes the goals, objectives, policies and maps which the City Council adopted by ordinance. Volume II provides the data inventory and analysis that formed the basis for the plan.

The Broward County Planning Council, the South Florida Regional Planning Council and the Florida Department of Community Affairs all played a major role in reviewing this Plan.

The following are the definitions of the terms goal, objective and policy as contained in the Florida Administrative Code:

Goal: the long-term end toward which programs or activities are ultimately directed.

Objective: a specific, measurable, intermediate end that is achievable and marks progress toward a goal.

Policy: the way in which programs and activities are conducted to achieve an identified goal.

MISSION STATEMENT

Continually improve citizens' quality of life through the provision of value-driven, quality public services and facilities that reflect the expectations of Plantation residents and the business community and confirm the City's commitment to responsible environmental stewardship.
